

PRESS RELEASE

A new Workboat has been delivered successfully by New Hellenic Shipyards

New Hellenic Shipyards have successfully finalized the new building of a workboat ordered by a foreign client, for a project in Israel.

The dimensions of the boat are L=13m, B=4.5m and T=1.1m. It has a main engine of 360hp, a generator, A/C & ventilation system, accommodation area for 10 persons and it is fully equipped with electronic navigation & communication systems. The boat has been designed and constructed by our experienced technical staff in accordance with Classification Society's rules.

New Hellenic Shipyards completed the project in time and budget, keeping at the same time high quality standards and full conformance with corresponding rules and regulations.
