

Monaco Yacht Show 2018

Spanopoulos Group, following the general trends in the Yachting and Shipping sector in general, participated also this year with a stand in the 28th Monaco Yacht Show. The stand, at the Quai De l'Hirondelle, stand number QH14, had great visibility/success and it is worth mentioning that it remains the first and only Greek Shipyard which has ever taken part in a show of such importance in the yachting world.

Leading international companies of the Yachting field showed a big interest to our group due to our high lifting capacity, the quality of our equipment and services and our organized and clean premises, after receiving positive feedback from our foreign clients.

We had the chance to present the development of the group the past years such as the extension of Salamis Shipyard, the new under construction site in Elefsis as well as our new goal to enter the world of New Buildings in yachting by presenting a prototype design inspired by Mr. Spanopoulos himself. The reactions were very positive both from people working in the yachting sector and eventual clients.

The level of the exhibiting yachts was very high both aesthetically and technologically. Some of them were also awarded from the organization at the MYS Gala 2018 such as M/Y Solo, from Tankoa Shipyards, by RINA as the most ecofriendly yacht, Illusion Plus for its interior design and Dar, from Oceanco shipyard, for its exterior design and both interior and exterior design and sustainable innovations and developments.

Our return from Monaco left us with the best impressions and serious proposals for synergies and collaborations, revealing an optimistic message for the future of yachting in Greece.

Mr. Michael Spanopoulos, the owner and Vice President of the company was accompanied by executives from the Business Development and Marketing department of the group. They were all invited in various events consisting of members of the Yachting business internationally.
