

PRESS RELEASE

Two Crew Boats have been delivered successfully by New Hellenic Shipyards

New Hellenic Shipyards have successfully finalized the new building of two Crew Boats ordered by a foreign client, for a project in Israel.

The dimensions of the sister boats are L=12.5m, B=4.3m and T=1.1m. They both have a main engine of 440hp, a generator, A/C & ventilation system, accommodation area for 10 persons and they are fully equipped with electronic navigation & communication systems. They have been designed and constructed by our experienced technical staff in accordance with Classification Society's rules and they have raised Panama flag.

The building of the vessels commenced on 15th June and the sea trials were finalized successfully on 15th October.

New Hellenic Shipyards completed the project in time and budget, keeping at the same time high quality standards and full conformance with corresponding rules and regulations.
